

**Amendments to the Claims:**

This listing of claims will replace all prior versions of the claims in the present application:

**Listing of Claims:**

1. (Currently amended) A computer-readable medium containing programming instructions for controlling brightness from a display unit, the programming instructions comprising:

calculating a display brightness within a specific first area displayed on a screen of said display unit, wherein the screen comprises a plurality of areas; and

controlling said display unit so as to change a screen brightness of the whole screen according to said calculated display brightness within said specific first area.

2. (Previously presented) The computer-readable medium of claim 1, the programming instructions further comprising:

using a power management function for controlling said display unit so as to change said screen brightness of said display unit.

3. (Canceled)

4. (Currently amended) A method for controlling brightness from a display unit comprising:

calculating a display brightness within a specific first area displayed on a screen of said display unit, wherein the screen comprises a plurality of areas; and

controlling said display unit so as to change a screen brightness of the whole screen according to said calculated display brightness within said

specific first area.

5. (Previously presented) The method of claim 4 further comprising:  
using a power management function for controlling said display unit  
so as to change said screen brightness of said display unit.
